

Oakpics photography workshops

- Oakpics style

Fast.
Focused.
Sharp.

For those of you that are not familiar with the Oakpics style you will soon discover it's all about combining your passion for photography in a fun and practical way. All you need is your equipment, enthusiasm, patience and an open mind.

Types of courses offered

½ or full day outings (one on one or group).

3 day workshop.

5 day workshop.

While discovering new beautiful scenes, we will teach you how best to capture what you see and more! Apart from the technical information we will share with you, we will take you out to put all the information into practice on a few hands-on outings. There will be group discussions, editing sessions and critique after each practical in order to develop your way of seeing things.

Our main aim is for you to go away from our workshops being able to use your camera confidently, knowing how to develop your shots to get the best possible photo. We will cover the basics but the most important thing for the Oakpics team is practicing practically. By doing this we consistently learn, we get to experiment, learn from mistakes😊, develop our skills and passion to its best potential.

We will guide you to use your own equipment. We want you to go away and be able to apply it when you are home/on your own.

This is not essential but we suggest you have a basic understanding of the principles of photography e.g. shutter speed, aperture and ISO in order to get the most from our workshops.

Group size is limited to 15 people so that each person can get the personalized attention that is needed. Please note: A minimum of 10 students must enroll before we will proceed with the workshop.
